BECAUSE WE LIVE HERE TOO

Our goal is to provide an honest, friendly and reliable service. As experts in our field, we are continually striving to improve the service we offer and our locally based team have a clear understanding of property and conservation areas that you cannot find anywhere else.

All of our products are manufactured in the UK and have been designed specifically to suit your requirements. We are committed to ensuring that the quality of our products and service remain consistent throughout our entire range and installation process, resulting in very satisfied customers.

TIMBER SASH WINDOWS

We understand replacing your windows is one of the biggest investments you will make when improving your property.

You want to ensure the products that you choose will not only look the part, but will also withstand the test of time. This is why we replace the whole window and frame rather than restoring the existing box. This will also leave you with a far superior solution to excluding drafts and noise pollution.

MECHANISM

Our traditional range sash windows come with spiral balance or cords and weights mechanisms.

The spiral balance is a modern day alternative to the classic box sash window, reproducing the original charm and character of an English sash window with a friction based method of operation.

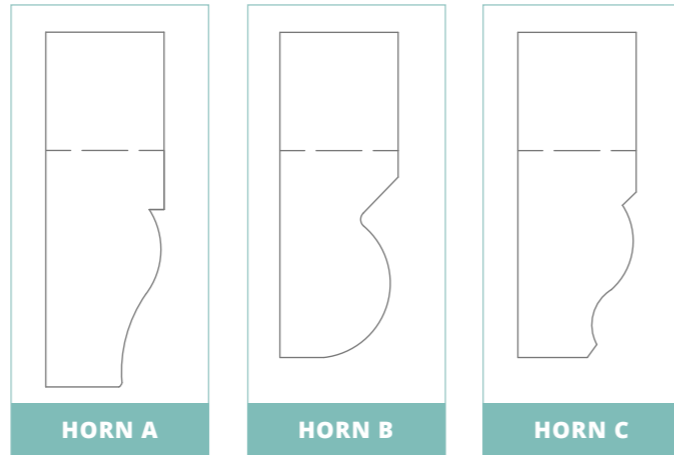

The cords and weights sliding sash window ensures the traditional character and charm of a period building is maintained, whilst incorporating the latest advances in timber window technology.

OUR TIMBERS

ENGINEERED REDWOOD
Redwood's alternate vertical grains provide greater dimensional stability, decreasing the risk of misshaping by minimising swelling and warping, ideal for timber windows and doors.

ENGINEERED GRANDIS
Grandis is a premium quality hardwood with exceptional durability. Due to its rapid growth it is one of the greenest hardwood options available.

“ I DID A LOT OF RESEARCH BEFORE CHOOSING SASH WINDOWS LONDON AND I MADE THE RIGHT DECISION. THE WHOLE PROCESS WAS CAREFULLY EXPLAINED TO BOTH OURSELVES AND THE ARCHITECT, STUDIO INDIGO. THERE WERE NO HIDDEN SURPRISES, THEY WENT OVER AND ABOVE EXPECTATIONS. EVERYTHING WENT TO SCHEDULE AND THE TEAM WERE POLITE, TIDY AND TOOK PRIDE IN WHAT THEY WERE DOING. THE END PRODUCT IS FANTASTIC.

**EDWARD MEDD,
C C CONSTRUCTION LTD**

HERITAGE TIMBER SASH WINDOWS

Our timber heritage collection is designed specifically to replace original period windows found in listed buildings and in sensitive conservation areas where double glazing is not accepted. We provide a made to order service to replicate specific details required.

Our heritage timber windows feature lambs tongue glazing bars, ovolo beading and external dummy putty lines. There are heritage ventlocks for child safety, a range of different horn details, slim frame sections and a front to back frame depth of only 140mm replicating a single glazed window.

HERITAGE TIMBER DETAIL

020 8397 8666 • www.sashwindowslondonltd.co.uk • info@sashwindowslondonltd.co.uk

“ THE WINDOWS AT MARIUS MANSIONS ARE ALL UNIFORM AND REPLICATE THE EXISTING GEORGIAN DESIGN. IT'S REMARKABLE HOW ALIKE PVCU SASH WINDOWS LOOK TO TIMBER. TIME WAS OF THE ESSENCE ON THIS PROJECT AND SASH WINDOWS LONDON WERE ABLE TO TURN AROUND WINDOWS AND DOORS WITHIN A SHORT LEAD TIME. THEY WORKED SEAMLESSLY ALONGSIDE MY OTHER TRADESMAN ENSURING INSTALLATION WAS SCHEDULED EFFECTIVELY AVOIDING ANY DELAY.

**ANDREW DRUMMOND,
BALHAM**

HERITAGE PVCU SASH WINDOWS

Our heritage PVCU sash windows are stylishly designed to replicate the slim lines and traditional details of timber sash windows. They include details such as shaped run through horns, market leading 35mm midrail, fully mechanical joints and are finished with a woodgrain effect as standard. The deep bottom rail and simulated putty-lines replicate traditional timber joinery details, whilst the sculpted glazing beads and Georgian bars add that extra touch of authentic styling, a great alternative to timber.

MECHANICAL JOINTS

HORN DETAIL

CONTEMPORARY PVCU SASH WINDOWS

Virtually maintenance free! Our Pvcu sash windows effectively reduce noise pollution and insulate your home. They include sculptured frames, beads and Georgian bars. As standard they come with a mechanical joint across the midrail and run through horns so that you can achieve the appearance of a traditional box sash window.

Our sliding sashes offer very simple operation with two sashes in an outer frame that work independently of each other on a balance mechanism.

Designed to hold each frame at any height with an ingenious feature allowing the sashes to tilt inwards facilitating safe and easy cleaning. Strength is enhanced by using steel within the chambers of the profile ensuring stability on larger windows.

ASTRAGAL BAR DETAIL

RUN-THRU HORN OPTION

TRADITIONAL PVCU SASH WINDOWS

Our traditional range PVCU sash windows offer a similar specification to the heritage range. The window is assembled with joints in the same places as a timber window, as well as that run through horns and woodgrain effect are included as standard.

These windows come in twenty eight different finishes and options to suit almost any home with a stunning heritage hardware range to match any finish. All our PVCu vertical sliders have a handy tilt open feature to both sashes for easy cleaning.

This range is a more affordable option for customers who are seeking an authentic, period style sash window without the premium cost.

For more information on this range please request our Traditional PVCU Sash Window Brochure.

TIMBER CASEMENT WINDOWS

FLUSH FIT CASEMENTS

Typically found in period properties, flush fit casements sit within the window frame ensuring slimmer frames and equal sightlines.

Our flush casement windows feature dummy butt hinges and traditional peg stays to replicate the windows traditional character, whilst using modern opening mechanisms ensuring ease of use and improved thermal performance.

The traditional flush casement window is particularly suited to period properties such as listed buildings, farm houses and barn conversions, especially those governed by conservation requirements. Also available in single glazed 4mm glass or slim line 14mm glass.

LIPPED CASEMENTS

Often referred to as 'storm-proof', lipped casements are manufactured with the opening sash proud of the frame, to give excellent gasket compression and the best weather rating available. We offer this style of window in both our traditional and contemporary profile.

Our lipped casement is a modern style window with traditional aesthetics suitable for high-end new builds and properties requiring extra protection from the weather.

Windows feature traditional ovolo moulding and bars, fixed sash for non-opening lights, casement stays, night vents and easy cleaning friction hinges as standard.

020 8397 8666 ● www.sashwindowslondonltd.co.uk ● info@sashwindowslondonltd.co.uk

TIMBER ALTERNATIVE CASEMENT WINDOWS

Our flush fit casement window system is specifically designed to authentically replicate the appearance of traditional timber window frames which are often found in conservation areas and listed buildings. These PVCU casement windows feature an external chamfered edge and decorative internal detailing. Fixed panes include dummy vents to create equal sightlines throughout and can include traditional glazing bars or Georgian lead detailing.

Flush fit casement windows come with a range of traditional hardware options including butt hinges, bulb end handles, monkey tail handles and matching peg stays.

“ SASH WINDOWS LONDON PROVED AN ABSOLUTE JOY TO DEAL WITH, PROFESSIONAL AND AWARE OF MY NEEDS TO TURN THE JOB AROUND QUICKLY AND EFFICIENTLY. IN TWENTY YEARS OF PROPERTY MANAGEMENT THIS WAS AN EXCELLENT EXPERIENCE.
SUSIE ABBOTT, BARNES ”

PVCU CASEMENT WINDOWS

FLUSH FIT CASEMENT

The Flush 70 is a fantastic, cost-effective alternative to our timber and timber alternative ranges. It combines modern performance with traditional styling offering authenticity without too much compromise.

The range benefits from a 70mm frame depth and flush casement design. There is also a wide range of traditional furniture options and wood grain finishes.

LIPPED CASEMENT

Designed for long-life to provide rigidity and strength as well as being a natural insulator.

Our PVCU profile is manufactured to the highest standards with very low maintenance. No more warping, swelling, rattling or distortion. Fully sculpted frames, beads and astragal bars with concealed gaskets fitted as standard.

“ I HAVE USED SASH WINDOWS LONDON TWICE NOW AND BOTH TIMES HAVE BEEN SO PLEASED WITH THE RESULTS. FROM THE INITIAL SALE TO THE COMPLETED INSTALLATION, I CANNOT FAULT THEIR SERVICE. EXCELLENT RESULTS BOTH TIMES I HAVE USED THEM.
**FERNANDA OLIVEIRA,
CLAPHAM** ”

TIMBER ENTRANCE DOORS

Our Bespoke traditional front doors are as original as the properties we create them for, ideal for period properties including Victorian, Edwardian and Georgian. As specialists in period properties, we can carefully match your existing front door, or work with you to create a unique design that stays true to the character of your property.

Our entrance doors are available in classic, heritage and creative styles. The classic range features time honored designs, whilst the creative range is comprised of contemporary sleek and flush panelled doors. The heritage range incorporates period door styles inspired by the Georgian, Victorian and Edwardian eras.

Strengthened timber combined with thick laminated glass enables fully glazed doors to offer exceptional thermal efficiencies and excellent security whilst still allowing a lot of natural light into your home.

COMPOSITE ENTRANCE DOORS

The Solidor range of composite doors are widely admired for their stunning design and unparalleled security. No other composite door comes close to competing with Solidor in terms of sophistication and performance.

They come in the largest range of composite door colours from stock in the UK. Choose from 23 colours inside and/or outside of the door, with 18 frame combinations. Amongst their hugely diverse colour range is a number of industry firsts including Rich Aubergine, Chartwell Green, Duck Egg Blue, French Grey and Irish Oak.

There is a fine selection of beautiful accessories for these composite doors including an array of elegantly styled and finished hinges, handles, letter plates and door knockers. Whether you're seeking a modern or traditional looking composite door, you will find an accessory to really make your property stand out.

Doors include Ultion secure keys which cannot be copied, multi point claw locks and internal thumb turn cylinders.

TIMBER FRENCH DOORS

We have two styles of timber french doors. The lipped version is a modern profile suitable for installation in conservation areas and is most commonly chosen for prestigious new build mansions, refurbishment properties or barn conversions with a stone or brick finish. The flush french door has a more classical flush line appearance that can be designed to incorporate a number of single and double door leaf configurations to suit specific build requirements.

The slim sectioned flush profile is particularly suited to period properties, in areas where specific conservation requirements must be adhered to.

Both options open out as standard to maximise space and integrate the outdoors with an inside space. Opening in options are also available where required.

TIMBER ALTERNATIVE & PVCU FRENCH DOORS

As with our timber range we offer both a lipped and flush fit versions of our french doors. Lipped doors are a more modern economic alternative, suitable for installation in most homes and new builds. While the flush fit are classic, designed to replicate traditional timber doors with flush fit sashes.

Both have additional features such as decorative glass and Georgian bars. Our french doors can be tailored to your specific requirements and we also offer a range of colours, foils and finishes.

All our designs offer the same high standards of security and quality construction. They also have the benefits of modern PVCu including noise reduction, low maintenance and energy efficiency.

BIFOLD DOORS

A visually stunning product, available in a wide range of RAL colour finishes. Using the slimmest frame technology, maximising on glass area.

Our bi-fold doors incorporate the most advanced thermal breaks, weather tight seals and locking mechanisms ensuring they are low maintenance and weather proof. All our doors are fully weather rated by British standards and surpass British Building Regulations.

Design configurations are available with up to 10 leaves, spanning up to 10 metres wide and can open up the entire side of a property.

BIFOLDS

All our furniture comes in polished chrome, brushed chrome, brass & antique brass. A selection of other finishes are also available upon request. **Please email us at info@sashwindowslondonltd.co.uk for our full furniture selection.**

ALUMINIUM HERITAGE DOORS

Our Alitherm Heritage Door is the ideal replacement when looking for something a little different to a bifold, especially if you are in a period property.

The industrial look is an increasingly popular choice when transforming kitchens or extensions. The Alitherm Heritage range includes a narrow and elegant profile which matches the look of a Traditional Crittall door but without all its draw backs, like single glazing, rust and poor security.

The system uses modern aluminium profiles that feature polyamide thermal breaks, allowing the system to achieve a U Value of 1.5 W/m² k when installed with a suitable sealed unit. Single or double doors feature slim sightlines, tape or gasket glaze, multi point locking mechanisms and authentic lock blocks to achieve that classic retro look.

“ I FOUND SASH WINDOWS LONDON AFTER A LONG RESEARCH ONLINE. THEY HAVE BEEN EXTREMELY HELPFUL SINCE THE BEGINNING. I CHATTED TO THEM ONLINE AT FIRST, THEN WENT TO THEIR SHOWROOM TO LOOK AT THE DOORS. I WAS SO CONFIDENT IN MY VISIT, I PLACED AN ORDER VIA EMAIL A FEW DAYS LATER.

WAITING TIMES WERE NOT SHORT AS IT WAS ALREADY LATE AUTUMN WHEN WE ORDERED, BUT THE WAIT WAS TOTALLY WORTH IT.

THE DOORS HAVE TOTALLY TRANSFORMED OUR KITCHEN. I LOVE THE CRITTALL STYLE LOOK FOR UNDER HALF THE PRICE OF ORIGINAL STEEL FRAMES. I WOULD STRONGLY RECOMMEND SASH WINDOWS LONDON LTD.

JOHNNY GUSELLI, PARSONS GREEN

SLIDING DOORS

If you are looking for a solution that brings natural sunlight and opens up a room to add a feeling of spaciousness and vibrance, our sliding doors have the functionality and aesthetic you require.

Our patio doors make a seamless cohesion between the outdoors and indoors possible, with a transparent screen that offers beautiful views and slim sightlines.

In a world where maximising your garden space is key sliding doors are the perfect option. When closed you have can have huge expanses of glass with minimal interruption from framework, however when you want to open them you are not encroaching on your outside space like you would be with a Bifold or French door.

OUR DOORS INCLUDE THE FOLLOWING FEATURES:

- Extra slim 42mm sightlines
- Door panels up to 2.5metres wide
- Colour matched contemporary handles
- Flush fit threshold options to keep the floor the same level both inside and out.

SLIDING DOORS

SECONDARY GLAZING

Secondary glazing is a lightweight aluminium window fitted inside of your existing window. It provides an alternative to ripping out old windows and replacing them with modern double-glazed versions.

Our secondary glazing is designed so that its bars and sightlines exactly match those of the window it is fitted to. This means that you cannot see it from outside of the property. It has opening sections that match those on the original windows, so it doesn't get in the way when you want to open your windows.

Any period building with original windows is a prime candidate for secondary double glazing. Your building may be listed or located in a conservation area. Or you may just love your original windows and not want to replace them. Whatever the reason, there are many thousands of UK buildings where replacing original windows would be either insensitive or forbidden, especially in London.

Secondary glazing solves this problem by adding a second, unobtrusive window inside the original. This creates a double-glazed effect which significantly boosts energy efficiency and reduces noise pollution.

GLASS OPTIONS

Our windows and doors can be supplied with a variety of glazing options to suit individual project specifications. We offer double and triple glazing, 4mm single and 14mm slimline double glazing with a vast range of obscure glazing patterns with varying privacy levels. In addition to this leaded designs and specialist glazing, such as painted, bevelled, anti-sun and self-cleaning, are also available.

ACOUSTIC & TRIPLE GLAZING

Acoustic glass is available where a high decibel rating is required; this is of particular benefit for properties situated in areas where outside noise surrounding the property may be of concern. Recently published press articles have raised concerns surrounding the negative effects that exposure to high noise levels can have on health. We offer products with acoustic glazing options across both our timber and PVCU ranges where a higher decibel rating is required.

We have recently introduced a wide range of bespoke timber windows and doors also in our PVCU range that are available in triple glazed options. We are one of the only few companies able to offer triple glazing on tilt and turn and sliding sash windows. Our triple glazed products offer excellent U-Values with softcoat low 'e' argon filled units with a centre pane U Value of 0.7w/m2k.

Triple glazing is the ideal choice for larger glazing areas as it allows maximum glazing sizes with minimum heat loss. Choosing triple glazed units can also increase the acoustic performance of a window through improving sound insulation in the home.

* By increasing frame and sash sections sliding sash can accommodate 36mm glazing units which can achieve up to 45 db

SINGLE & SLIMLINE DOUBLE GLAZING

Single glazing or slimline double glazing options are available on all timber windows and doors from the Heritage Range. These products are ideal for projects where standard double glazing options are not deemed suitable for either architectural, planning or conservation reasons.

We recognise the importance of achieving a balance between architectural sensitivity and window performance. Our product ranges have been specifically designed to incorporate energy saving properties. Our 14mm slimline double glazing has been designed to look identical to single glazing whilst saving energy at the same time.

MATERIAL - TIMBER

ENGINEERED REDWOOD: 30 YEAR WARRANTY

Engineered timber is composed of flawless cuts of solid European Redwood, which are then glued, compressed and laminated together in a pattern of alternating wood grains.

Redwood's alternate vertical grains provide greater dimensional stability, decreasing the risk of misshape by minimising swelling and warping, ideal for timber windows and doors.

Engineered Redwood is sourced from Northern Europe and is FSC Certified. This wood is produced specifically for joinery application and is ideal for the manufacture of windows and doors.

ENGINEERED RED GRANDIS: 30 YEAR WARRANTY

Grandis has many advantages over other timbers used in the industry. We truly believe that it is overall the best hardwood on the market.

Grandis is a premium quality Hardwood with similar characteristics to oak. This timber is the perfect option for high end uses due to its marking and exceptional durability.

Before treatment this wood consists of a darker more detailed grain making it the perfect solution should you require a lacquer or stained finish.

MATERIAL - PVCU

SMOOTH FINISH

We recommend our smooth surface finish to customers seeking a more modern look. This cost effective option holds a warranty of 10 years, the smooth effect comes in a large selection of colours including Farrow and Ball's distinctive palette.

WOODGRAIN FINISH

The capability of a textured woodgrain profile provides the authentic alternative to timber. The standard white foil not only provides a woodgrain effect but also a slightly creamier shade of white which timber naturally contributes adding to its authenticity. Our woodgrain comes in a number of different foils closely matching traditional timber colours.

FINISHING TOUCHES

All of our products are available in an array of finishes and colours, including any RAL colour and now our traditional heritage Farrow and Ball range.

TIMBER PRODUCTS

Our timber products go through a four-stage finishing process consisting of an anti-rot and fungal treatment, the primers and finally the finishing two coats. We are one of the few companies on the market able to offer a 10-year warranty on our paint finishes.

We also offer dual colour finishes or stains to suit internal decor and external facades.

RAL COLOUR CHART

ENVIRONMENT

SUSTAINABILITY AND OUR ENVIRONMENT

As we are all aware, our planet is threatened by severe climate change. The Earth's global temperature is warming, meaning that weather patterns and ecosystems are changing more quickly than people can adapt but something can be done. We have the knowledge and technology to help reduce the impact on our planet, we all just need to be responsible for what we can each change.

We believe double glazing is now more necessary than ever; our homes create a huge amount of co2 output. We provide high-performance A-rated products that deliver solutions for a more sustainable lifestyle, reducing energy consumption and limiting our impact on the environment.

At Sash Windows London we are proud to be certified by the Forest Stewardship Council. The FSC certification ensures that our timber products come from responsibly managed forests that provide sustainable environmental, social and economic benefits.

We ensure an environmentally friendly manufacturing process and also recycle all old products when completing an installation.

CLIMATE CHANGE AND ECO GLAZING

If all of the 25.6 million homes in the UK replaced their windows with energy-rated ones, we could reduce carbon emissions by up to 12.8 million tonnes a year. According to the Energy Savings Trust, an average household installing Energy Saving Recommended windows can typically cut carbon dioxide emissions by approximately three quarters of a tonne per year. This is a significant saving, as around 23% of the heat lost from an average home occurs through the windows. We provide high-performance A-rated products that deliver solutions for sustainable living.

We work to reduce energy consumption and limit our impact on the environment. To add to this, at the end of the life cycle of the frame, the timber, glass, aluminium and fittings are fully recyclable.

Our timber glass supplier, Saint-Gobain Glass, have now launched PLANITHERM® TOTAL+. Windows glazed with EcoClear which improve the energy efficiency of homes, allowing a homeowner to save money on their heating bills through free solar heat gain.

FSC® C007915

The **Wood Window Alliance**

INSTALLATION & WARRANTIES

MAINTENANCE

All our timber products come with a care pack. This should be used as instructed, to ensure you get the best from your installation.

- Our UPVC and aluminium products can be cleaned using a mild, water-soluble product.
- Glazed surfaces should be cleaned using specific glass cleaning products.
- Timber windows and doors should be annually checked for any cracks in the paint. These can sometimes occur due to the natural movement of the wood. These can be sanded down and touched up with the paint provided in your care pack.

INSURANCE AND GUARANTEES

On receipt of your final balance, we will register your installation with FENSA and send out our guarantees and all receipts. Please be aware that FENSA certificates generally take 4-6 weeks to arrive.

We advise that you add your new products to your home insurance policy.
